

RISE with SAP S/4 HANA Private Cloud For WEWORK

Business Scenario

WeWork being one of the largest providers of flexible workspace solutions requires Intelligent Enterprise Solutions that recognize, internalize, and adjust to even the slightest changes in consumers' expectations, preferences, and habits.

Customer Benefits

- Streamlining the process of Managing Lease-in lease-out.
- Seamless interface of the sale of space rental and allied services via Salesforce.
- Budget control and tracking of the entire Capex and Opex spend.
- Interface the Procurement Process with Spaceman.
- Streamlining Asset management and statutory reporting.
- Financial Planning and Analysis.
- Interface with Build supplier for Pre-sales and tendering process.

In2IT EBS Differentiators

As a solution partner, In2IT EBS understands the requirement and the need of Intelligent Enterprise Solutions. In2IT EBS in support of SAP suggested a package that can effectively use data across the company and process them in a centralized way. SAP S/4HANA will help WeWork with their robust ERP system ensuring faster, real-time analytics and compute capabilities.
